PROVENTIA TRAILER FTF FILTER HOW TO IDENTIFY YOUR TK TRAILER REEFER YEAR & ENGINE MODEL

Before you order your Proventia Trailer FTF filter or injectors for your TK Trailer (SB, Super II, or Sentry) reefer, you'll need to identify which engine model is in your reefer. Here are two easy ways to identify your engine model:

- 1) Find the serial number for your reefer. For Yanmar engines, the serial number is on the top of the valve cover; one letter followed by 5 digits. For Isuzu engines, when you're looking at the engine straight on, on the lower right corner, there's a flat protrusion off the cylinder block about $\frac{3}{4}$ " high and 1" wide (right near the hand fuel pump) with a 5- or 6-digit number stamped in it, possibly with an E in front of it.)
- 2) Identify your reefer year. This is indicated by the 3rd digit in the reefer serial number. (You must know the decade.)

Then find the year of your reefer on the list below. For 1991-1993 or 1998-2002, refer to the illustrations below to identify your reefer engine model.

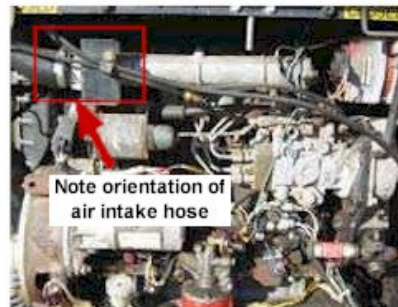

REEFER YEAR ENGINE MODEL

1985-1990	Isuzu di2.2
1991-1993	Isuzu di2.2 or Isuzu se2.2. (See illustration #1 below, to identify your reefer engine model)
1994-1997	Isuzu se2.2
1998-2002	Isuzu se 2.2 or Yanmar TK482/TK486 (See illustration #2 below, to identify your engine model)
2003+	Yanmar TK482/TK486

ILLUSTRATION #1 (For Engine Years 1991-1993, required for correct filter kit identification)

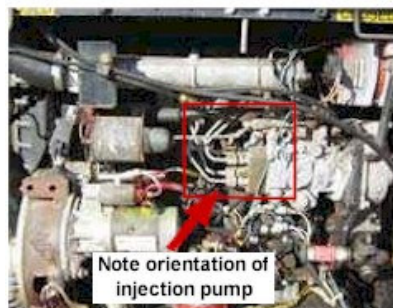

ISUZU di2.2
(from 1985
to 1993)

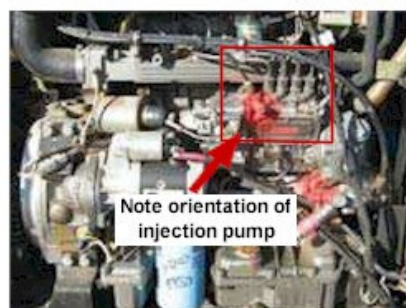

ISUZU se2.2
(from 1991
to 2002)

ILLUSTRATION #2 (For Engine Years 1998-2002, required for correct injector identification)

ISUZU se2.2
(from 1991
to 2002)

**YANMAR TK482
OR TK486**
(from 1998 to
2002+)
